Summary

This is a awesome design by @djedje_zr7 As we have a extra family member I added a extra slot.

This is a remix. I added a extra tooth brush slot, added some feet to the base and added a small hole in each cap, going through the base to allow for drainage of any dripping water.

Thanks for the original author for this beautiful design.

I included step files for those that wish to print with the Bambu, also STLs and like the author a .F3D if anyone wants to edit this.
