This is a play card holder for the little hands of my kids, that are not able to hold many cards.

I designed it with two rows and enough space between them for easy grabbing of the front cards. Most holders with two rows are too tight in my opinion.

Another point was the distance in height, so that the corner signs don't overlap, like I've seen at other holders.

I hope you and your kids enjoy the holder.

Used filament in the pictures is "gepresste Limette" ("squeezed lime") from Recyclingfabrik.
