Many other paper towel holder are too light and the towel friction is enough to pull and move the dispenser itself. This paper towel holder spins with the towels and is much easier to dispense towels from.

Functional and good looking!

- Heavy
- Spinning insert design
- Pillars for towel threading making dispensing easy.

****Work the threads in and out a few times before over tightening. There is some play in the threads but they can be a little sticky when first fitting the pieces together.****

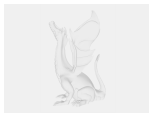

I had one set of WOOD PLA poles break (PETG prototypes never broke) at the thread joint when unscrewing the center pole pieces when I didn't

work them first. I increased the infill of the threads to compensate but take your time putting them together.
