Summary

I tired of wasting time with the little scoop that Breville gives you with their coffee machines, so I made my own.

Tags: [coffee](#) [coffeemachine](#)

I was tired of wasting time with the little plastic scoop that Breville gives you with their coffee machines, having to scoop 3 times for one double shot (and I make 3 coffees every morning) so I measured and made my own so I only have to scoop once per double shot.

The volume is 45cc (approx 3 US tablespoons) for a double shot size dose for 54mm Breville portafilters.

Supports not needed when printed handle-side down.
