My variation of female Dummy 13 model, based on dummy 13 v1.0 release version

Armour fully modified. I've tried to round all sharp corners, but leave dummy's lines.

Legs here are not same part as in original dummy.

Frame left intact.

Print instruction is the same, as for original dummy:

Frame **should not** be printed in PLA. Use PETG, ASA, ABS

Armour could be printed with any plastic.

Models on photo are printed in 150% scale.

Please, share your make and your thoughts.
