The coolest checker set ever! Well, that might depend on your perspective, but these designs are unique and add a new dimension to the checkers game. There is a hard-edged version and an organic design, both as a single and 12-piece grouping. Both designs were created to be stackable.

You may need to file any elephant foot (bottom layer spread) for proper fit.

default width = 32 mm

Enjoy!

The resin print, along with the epoxy board, is available for purchase at the following website:
