Santa Claus and Mrs Claus Candle holder.

For LED candles only

No glue or extra parts needed, just print and play.

See all my designs on cults:

<https://cults3d.com/en/users/jajaum3d/creations>

Printing

All files in STL to print without any support.

The files are already in the best orientation to print and can be printed with your standard 0.2mm layer config.

In the pictures, they were printed using 3 walls and the new lightning infill. There is a single color piece of them too.

See the pictures for assembling instructions, but it's really straight forward.
