Summary

Single row egg tray for the fridge/pantry

[Household](#) > [Kitchen](#)

Tags: [egg](#) [eggs](#) [eggtray](#)

I needed a single row egg tray for my fridge but couldn't find a model already made, so here it is.

It measures 50mm wide x 280mm long and can fit 6x large eggs.

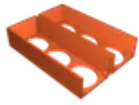

I have split the design in half, so that it can print on my Ender 3S1 which only has a bed capacity of 220x220

The two halves join via a male/female pin, I didn't need to use any glue as the tray just sits in the fridge with eggs on top, so it doesn't really move. You could however use some resin/superglue if needed.

Printed with:

- 0.4mm layer height
- 10% infill
- PLA+
