You always end up buying more spices!

It annoyed me that even though we had a spice rack the extra jars we added would end up cluttering the kitchen side.....kind of defeating the point of the spice rack in the first place.

This is a modular design with only one repeatable component. If you buy another spice jar, just print another part and add it to the rest of the rack. It has the added advantage of being able to be assembled in a pattern of your choice.

It works with most jars you can get from the supermarket.
