These coasters are very flexible. They are made using my version of 3D printed "fabric" and it's also the first time I publish the "fabric" itself.

If you dare, you can split the pieces in slicer and form a new ornament ;).

There are 3 sizes in the files below, 6x6, 8x8 and 10x10 pieces.

**Printing:** There are no special printing requirements, **NO supports**. For example 0,2mm layerheight, 2 perimeters, 15% infill, 6 top layers, 4 bottom layers.
