Tags: [vase](#) [planter](#) [modern](#) [vases](#) [moderndesign](#)
[planterpots](#)

Just a sleek, modern vase/planter. Both base and vase have a drainage hole in the middle if used with live plants.

Instructions: Print vase, base and 4 feet. Holes in the bottom of the base and pegs on the feet make a push to fit assembly simple. Glue can be used if needed, but from my tests should not be.

Model shown printed with Hatchbox Granite PLA for vase, Hatchbox Wood for base/feet.

0.2 layer height, default settings on Bambu P1P
