This is a modular shelf insert designed to **maximize vertical space inside kitchen cabinets**. It's ideal for **cups, bowls, plates, or other kitchenware** – helping you organize your cabinets more efficiently and neatly.

The riser consists of two separately printed parts:

- **Top panel** – flat surface where items are placed
- **Legs** – insert easily and hold the shelf securely

Printing the **legs and top separately increases structural strength** and allows better print orientation, minimizing weak points and improving surface quality.

Dimensions:

- **Top panel:** 230 × 200 × 5 mm
- **Leg height options:** 80 mm or 150 mm

Available top styles:

- **Web-style** – visually interesting and lightweight
- **Honeycomb** – strong and stable with open airflow
- **Wide stripes** – minimalistic and easy to clean

Key Features:

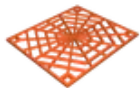

- Fits most kitchen cabinets or shelves
- Great for stacking **cups, plates, bowls, food containers**
- **Increased strength** due to separate-leg design
- **Modular and printable without supports**
- Improved airflow and less moisture accumulation under dishes
- Easy to scale to fit your own storage space

I use mine in my kitchen cabinet for mugs and plates – works great and looks clean.
