### Summary

A cute calibration cat (reupload from Thingiverse)

[3D Printers](#) > [Test Models](#)

Tags: [calicat](#) [benchmark](#) [cat](#) [calibration](#) [3dbenchy](#)

Cali Cat is designed to be the purrfect initial calibration and benchmarking print. It is a simple, standard test to ensure you have the basics down before proceeding to advanced prints. Cali Cat is the alternative to boring calibration cubes. It's a test print you can enjoy keeping. It consists of linear dimensioning tests of a calibration cube and more:

Body: 20x20mm

Height: 35mm

Tail: 5x5mm

Inclines and overhangs: 45°

Calibrate your printer and grow an army of cats in the process!
