This is a playing card holder for games that require a 'draw' pile and a 'discard' pile. It will hold two packs of normal playing cards 87mm (h) 57mm (w). Designed to be printed in PETG. I have backed it with some self-adhesive baize cloth to avoid scratching tables as it is moved. It was originally printed in colours to compliment the 'UNO' game and this gcode includes x2 colour changes PETG. External sizing allows it to fit into the original UNO box.

I have also included gcode to simply print in 1 colour PETG

[my standard PETG settings are 240/85 first then 250/90]
