Summary

Design your own wall art that fits in with my designs.

[Art & Design](#) > [2D Plates & Logos](#)

Create art that fits in with my designs found [here](#).

The frame allows the picture to hang on a wall, or stand on a desk or shelf. The picture plate should just snap in.

I recommend the thin 1mm plate to reduce material and print time. This also avoids infill becoming visible if the drawing is back-lit.

Important: Be sure to allow your print to fully cool before removing from the build plate to avoid warping it while still warm.
