There are two different sizes of the miniature house and each has two different versions (normal and hollow).

The small house has a base of 50x50mm

The big house has a base of 80x50mm

Normal:

The normal version of the house is solid and can be printed with infill. Use the normal roof for this version as it has a plane inner face. Simply glue the two parts together.

- House small + roof small
- House big + roof big

Hollow:

The hollow version of the house only has the floor and walls left to save filament. Use the roof hollow version for this as it has a catch on the inner corner to fit the hollow house. Simply glue the two parts together.

- House small hollow + roof small hollow
- House big hollow + roof big hollow

Printed with:

- Bavaria Filaments PLA white and red
- @210°C
- 0.2mm layer height
- 0.4mm nozzle
- on Prusa Mk4
