Summary

So long have I been looking for a keyhanger that would suit my needs, that I had to design my own. Lo and behold!

[key](#) [keyring](#) [keys](#) [wallhanger](#) [carkey](#) [keyhanger](#)
[carkeys](#)

The hanger has just enough space among the hooks to accomodate multiple keys per keyring, while still not making the whole hanger too large.

The hooks have their curvature optimized to avoid key slipping, while still being able to print without supports.

There is enough plastic beneath the hooks to prevent scratching of the wall the hanger is attached to.

You can choose among two variants, one to be fixed with a doublesided adhesive tape (no holes), the other one with a pair of screws (holes 4 mm diam.)
