Looking for a discreet way to decorate around Christmas? Then this small tealight holder is for you! It's perfect for decorating a table, a coffee table or anywhere you want to put a candle!

A traditional candle is all you need, and even in PLA, the candleholder won't melt!

Print out the two parts, snap them together and place a candle inside!

If the tolerance (0.15mm) is too narrow for your printer, enlarge the outer part slightly.
