Introducing the Dummy 13 Heavy Sniper Rifle — our most powerful and commanding weapon yet. Inspired by the legendary Barrett .50 Cal, this beast brings serious firepower and an unmistakable presence to your loadout. From its long barrel to its intimidating profile, every inch screams long-range dominance.

Creator's Note:

This model **wasn't** designed with 100% scale as the primary intent. In fact, I strongly recommend using it at 200% scale or larger for the best results. That said, to stay consistent with my past uploads, the files are still sized at 100% scale for Dummy 13. While **100% may be achievable**, I haven't personally tested it at that size. If you plan to print it at 100%, I highly recommend a 0.2 mm nozzle to preserve detail and avoid loss of definition.
