We saw <https://www.thingiverse.com/thing:3375898> and thought this looked beautiful, so we printed it, then my sons girlfriend wanted to turn it into a jewellery box, so I imported it into Tinkercad, cut TVVGGE's base extended it and hollowed it out, but during the printing of the re-cut base it failed near the rim, so removed the incomplete base and printed just the rim in a different colour filament. I think it came out even better  
The base is just plain black filament, but the rim is Flashforge PLA Silk 3D Printer Filament 1.75mm, 3D Printing Material, Spool-Dimensional Accuracy +/- 0.05mm Fit Most FDM/FFF Printer (1KG, Coffee)
