Hi,

this is an easy Storage System for your Cards. I have used enough tolerances on the sizes, so it should fit for every Printer. I was thinking about adding a connection system, but I don't think that this is necessary. just glue them, if needed. But if you wish, I can add this on the next version.

I am also thinking about adding something like a window for notes, so you can put a note paper into for description, what cards are in which tray.

Please let me know in the comments, if wished.
