This pencil holder's woven appearance was designed to replicate the look of a basket.

For best results, print using a 0.2mm layer height. The majority of the print will be perimeters. Because of this, infill is not necessary.

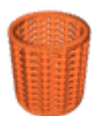

In terms of pencil holders, this is a relatively long print (8+ hours on my Mini+ for the original size), but the woven look is well worth the wait! Along with the original, I have also included tall and short versions. All have the same diameters, but with varying heights:

Original: 95mm

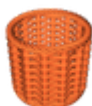

Tall: 112.5mm

Short: 78mm
