Summary

These mini lightsabers are super fun to play with, and they were just as much fun to design!

These are super fun to play with, and they were just as much fun to design!

A Quick Note:

These fidgets take hours to design. Please consider subscribing to my [Patreon to support my work and get access to my full library of designs](#), with over 20 of my most popular fidgets (including my Easter Spiral Passthrough Fidget collection), home decor items, and useful things to 3D print.

Included Files

- Case
- Cap

- Lightsaber - Three tolerance options. Standard worked fine for me, but depending on your printer, you may have better luck with the slightly looser or slightly tighter version (files are named to indicate which is which)

Printing Tips:

- Be sure to print the cap with the flat side down.
- No supports are required!

Assembly Tips:

- Use a dab of super glue on the cap to firmly secure it.
