Model sizes : 30 x 42 x 44

As a result of my usage trials;

In this version, the joints are more solid and provide a firmer grip.

The cable channels are compatible for thin and thick cables.

I adjusted the crimp settings so as not to damage the robustness.

The oval structure at the inner corners prevents breakage well.

The design features a cable icon recess on the back. This adds a touch of elegance to the piece.

All thickness settings have been tested to ensure a sleek, easy on the eyes design.

The notch at the end of the cable holder section under the table provides a tighter grip.
