Supplies Needed

8x3 mm Magnets (2 required) & superglue to hold them in. Magnets are optional.

Description

A small jig to guide your screws and nails straight and to protect your fingers. The tip is printed with 50% infill so a hammer or screwdriver won't do any damage. There's a small brim you need to peel off on the back end. I quick squirt of WD really makes the hinge swing smoothly. Feels like it was machined.
