Tags: [chess](#)

Modern chess set using hexagons for the shape of every piece. I recommend printing these on a SLA printer rather than FDM due to the finer details on the rook piece. I may upload a different version to allow better printing on other machines. The pawn piece is also a little too round for my liking, so I may change that one as well.

NOTE: I changed the rook piece. I think it looks better and fits with the rest of the set more than the previous version

Print Settings

Printer Brand:

Anycubic

Printer:

Photon

Rafts:

No

Supports:

No

Notes:

I put small chamfers on the bottom of each piece, so it will be much easier to remove from the build plate and no supports will be needed.

Category: Chess
