Summary

Small bowl for measuring and transferring coffee beans and tea leaves

[Household](#) > [Kitchen](#)

Tags: [bowl](#) [coffee](#) [funnel](#) [beans](#)

I wanted a small bowl to measure and then transfer coffee beans to the grinder, something similar to the ceramic one James Hoffmann uses in his YouTube vids.

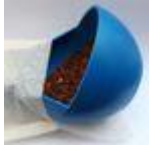

I found the Tea filter funnel by ecsv, and realized with a bit of editing it will be perfect for my usage.

I've made the funnel snout shorter and with more of a curve, added a higher lip to help keep the beans in.

For aesthetics, it would be best if you either print them in thin layers or use adaptive layer heights.

No supports required.
