Tags: penholder   customizer

Elegant and futuristic penholder with the shape of a hourglass.

And now you can customize it!

No overhang support should be necessary to print this model.

P.S.: Maybe there are some rendering problems with the MakerBot Customizer App... but if you download the SCAD source code and render it with the free openSCAD software, the final result is perfect.

UPDATE: the Customizer App has been fixed and now you can correctly produce your own customized Hourglass Penholder!
