Summary

Soap dish that I use to keep my bar soap from getting soggy in the shower and help keep my shower cleaner.

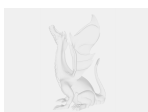

[Household](#) > [Bathroom](#)

Tags: [soapholder](#) [soapdish](#) [soaptray](#)

Nothing fancy, basic soap dish that keeps my bar soap from being soggy in the shower. Water will drain as the base is designed to drain cleanly. Different from other designs as this one drains from the short end rather than the long side as this fits my shower better.
