### Summary

One print multicolor chess bord. Why bother with many prints and parts.

One print multicolor chess bord. Why bother with many prints and parts.

### Slicing instructions

1. Start by slicing the model.
2. Add new color layer by pressing the plus sign in the layer viewer

## Inspiration

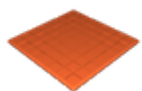

When I made the “COVID-19 genome” model, I realized that you can have many materials in the same print. With this method, I should be able to improve my chessboard so that it becomes more robust and easier to print.
