Unlike most of my ornaments this year, this one isn't part of a set.

I've provided my PrusaSlicer project files (3MF) and GCODE for a Prusa MK3s+ printer. With my settings, the final ornament weighs very little! It also looks great in opaque or transparent filaments (see pics above).

I'll be publishing a new ornament every day! (OK, **almost** every day. Everybody gets a day off once in a while.) Follow me to stay up to date!

If you don't use PrusaSlicer or a slicer that can read PrusaSlicer project files, I've provided detailed print settings on my [Thangs Blog](#).
