Tags: [egg](#) [storage](#)

My family and I go through a lot of eggs and wanted a way to store more eggs and make better use of the space in my refrigerator. I wanted it to store 36 eggs since that's how many I buy at a time but there wasn't room in my fridge. Also, I maxed out the printable height on my Ender 3 Pro .

I printed this with PETG and modified the center structure to provide more support, given the increase height.
