Christmas tree cookie cutter

Christmas is coming, so I decided to make some cookie cutter in modern style.

Dimensions of cutter are **37x51x12mm** (after rounding). Print should take around **1h10m** with default **0.15 QUALITY** Prusaslicer profile. Printing with different layer height should not be problem too.

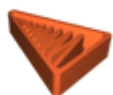

The “result” how cookie should look like is rendered on the right side (the yellow one) of render photo.

Merry christmas!
