Below the file name contains the quantity EX: x2 or x4

This is my first action figure . I have spent a lot of time modeling and tweaking this and i am still not finished. This model is still under development and i will have updates coming for it very soon.

Everything prints **100% support free** but you will need to be able to print some minor bridges.

Below i have a couple videos that will help with assembly. The thigh and bicep you should hear two clicks and easier first click then a harder second one you may need a rag or something to press it down harder.

WD40 will help with articulation inside the bicep and thigh but it is not required.

If anybody has any questions or problems with anything feel free to comment or message me.

Nimbus 1.0

More updates
to come...
