Thank you [PhilippHee](#) for the tree for this project.

<https://www.printables.com/model/91255-christmas-tree-windowdoor-sign-2>

I took this design, shrunk it down, and added a tab on the bottom so it could be used as a napkin holder. The base is designed so that the sides do not need to be glued into it. This way it allows for easier storage when Christmas is over or different sides added for different holidays.

Everything is printed flat so no supports are needed.

I used Numakers PLA+ to print both the base and the walls
