These beautiful ornament bulbs print 100% in vase mode and don't need much filament!

The ornaments in the photos are printed in **PLA** using a **.4mm** nozzle, and are using **1/2in caps**. Here's a link to the ones I used: <https://a.co/d/h9IB8qU> (non-affiliate). I've also designed ornament caps that work quite well. Depending on your printer/settings you may need to scale them up/down slightly or add a bit of glue (I used E6000 for mine)
