Print Details:

This tank AAA battery holder **needs support** for overhangs and details!

Designed for easy FDM printing on most printers.

Best oriented flat on its base for stable printing.

Use 0.2 mm layer height for faster prints or 0.1 mm for a smoother finish.

Recommended infill: 15–20% for a good balance of strength and filament use.

No assembly required — remove supports after printing, and it's ready to use
