

Assembly Guide

Modular Truck: Base Truck

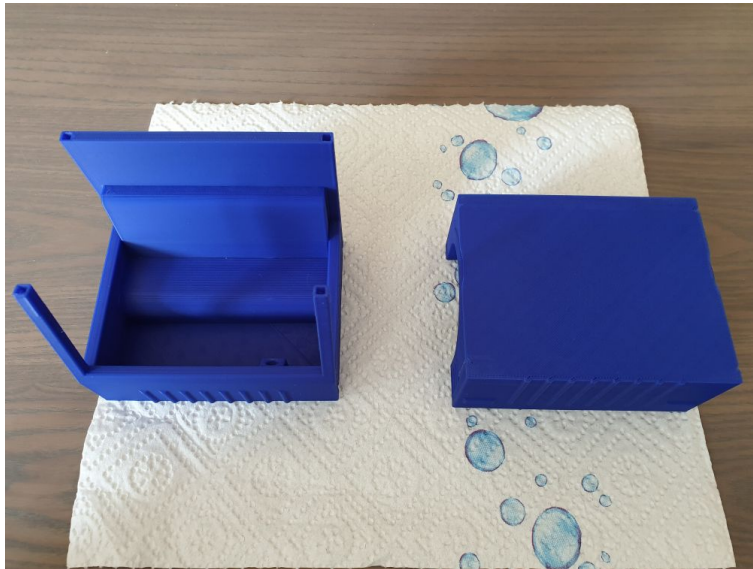

Step 1:

Glue the Cabin together. You can skip this Step if you printed the Cabin in one Piece and go to Step 2.

Parts needed:

Cabin Bottom

Cabin Top

Procedure:

Glue the 2 Parts together with a Glue for Plastic. Let them good dry so they do not move.

Step 2:

Glue the Roof to the Cabin

Parts needed:

Cabin

Roof

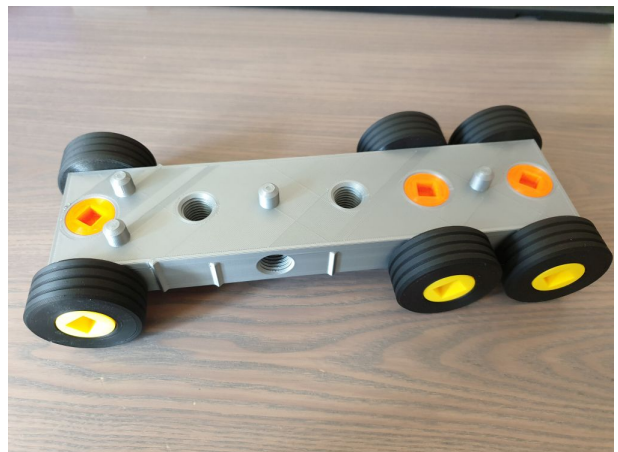

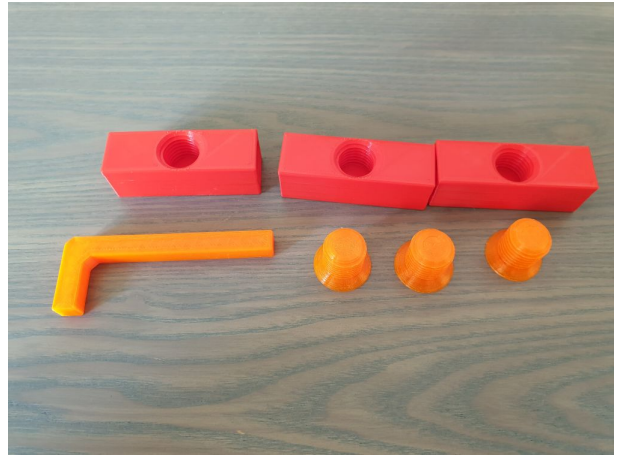

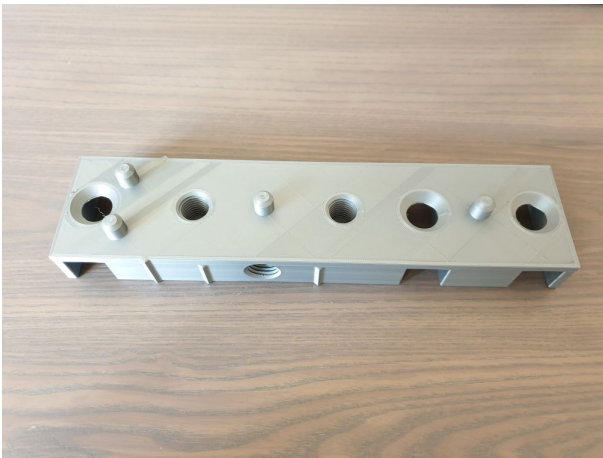

Procedure:

Put in the small Holes on the Cabin a bit of Glue. I put it in with a Toothstick. Fit the Roof in and let it good dry.

Step 3: Mount Axles and Wheels to the Mainframe.

Parts needed:

- Mainframe
- 3 Axles
- 3 Axlescrews
- 9mm Key
- 6 Wheels
- 6 Wheelscrews
- 12mm Key

Procedure:

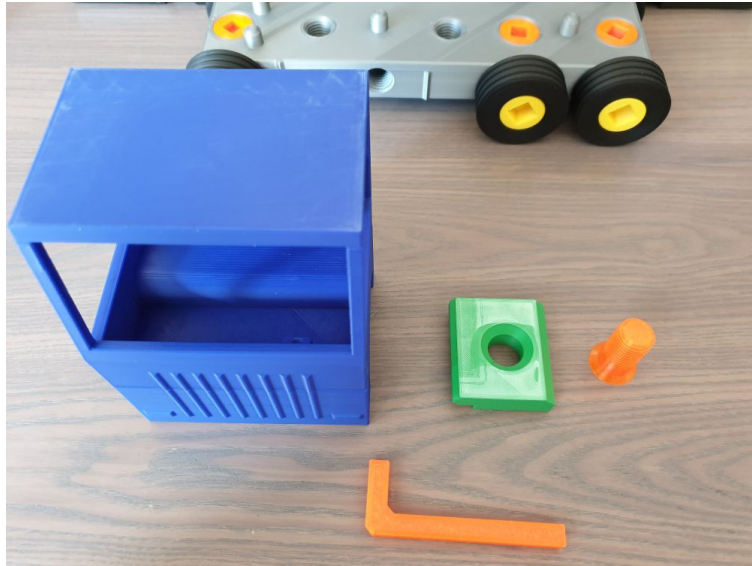

Screw the 3 Axles with 3 Axlescrews to the Mainframe. Use the 9mm Key. Then screw the 6 Wheels with the 6 Wheelscrews to the Axles on the Mainframe with the 12mm Key.

Step 4:

Mount the Cabin to the Mainframe.

Parts needed:

Cabin
Mainframe with Wheels
Cabinholder
Cabinholderscrew
9mm Key

Procedure:

Slide the Cabin over the Mainframe so the Slots fit together. Then slide in the Cabinholder and secure it with the Cabinholderscrew using the 9mm Key.

Step 5:

Mount the Fenders to the Mainframe.

Parts needed:

Mainframe with Cabin and Wheels
Fender Left and Right
2 Fenderscrews
9mm Key

Procedure: Mount the Fenders with the Screws on the right Side. You cant put it really wrong.

Step 6: Mount the Steeringwheel to the Cabin

Parts needed: Mainframe with all attached Parts
Steeringwheel

Procedure: Push the Steeringwheel in the Hole in the Cabin.

Step 7: Finish! =) You have finished the Base Truck. Now took a Module and mount it Step by Step to the Truck.
