Summary

This phone stand is designed to be printed with no supports and allows for large phones.

Tags: [phonestand](#) [phone](#) [phoneholder](#) [phonemount](#)
[phonedock](#) [phoneaccessories](#)

This phone stand had a route for a cable that goes through the entire print. The routing is a bit tight but easy to route regardless. This was mainly designed for bigger phones and has a 22 mm opening for the phone.
