## Summary

This is a great mini watering can for watering any small plants or planters.

This wonderful planter works great for watering any small house plants that you have. This will need supports and I recommend the organic/tree supports. Just make sur that you put a support blocker on the top hole, or put the setting that says only put support material on bed/build surface. Stay tuned because I will be most likely updating it so that it will have a sacrificial bridge layer for the hole to ensure that it prints good.
