Minimalistic Christmas tree like these ones out of paper. Scale them to get a nice scene.

I uploaded 4 models, 2 with a hole for hanging, 2 without the hole.

For each of this versions with/without hole I provide you one model which can be sliced and printed directly without supports - also printable in vase mode. Another one where you get the complete radius on the ground of the tree (my favorite). There you can decide if you want to use supports, erase the lowest 1-2 mm or however you want to print it. You know your printer the best :)

Merry Christmas
