Basic cheese slice holder.

- I'd suggest printing at 0.2 mm layer height. The design is optimized for that.
- I'd suggest printing with a 0.4 mm nozzle.
- ~20% infill is fine - it's just for the base. Make sure your settings are for 2 perimeters and that way the upright walls will print solid and cleanly.
- PLA will print the best; PETG will cause a lot of stringing between the guide pieces.
