This box is inspired by the Gift box found in 'Fortnite' when you gift a friend a skin within the game. We have also gone ahead and made the box customizable in any color you wish, just like it is also in the game!

This gift box is also designed so it can be printed on standard printers and fits together nicely with simply a bit of glue. The ribbon has shapes embedded with matching shapes on the box and lid, this is to make sure you glue the correct pieces in place, as they fit together in a certain way, so double check that before glueing.

We hope you will like this print as much as you do all our other designs and if so, we would greatly appreciate a quick review, doesn't have to be long but this helps us build up our channel to create more cool designs, just like this one.
