Summary

Simple 20oz bottle cap feeder

[Household](#) > [Pets](#)

Tags: [bottlecap](#) [feeder](#) [gecko](#) [reptile](#) [vivarium](#)
[crestedgecko](#)

I wanted a way to recycle bottle caps into a feeder for my crested geckos and mourning geckos. I couldn't find what I wanted so I designed it myself. It's held onto the glass via command strips or any other suitable adhesive pad. Includes a drain for water or spillage!

Print settings:

0.4 nozzle

0.2 layer height

10% infill is plenty strong enough for a sub 100gr animal. Increase walls for strength if you think it's needed but I only use 3 walls.
