I have been making flexi toys lately so I thought that I would make a shark because I like them. This one is pretty cool, I added more things such as the, mouth, eyes, and gills. If you like this model, make sure to follow me and check out all the other ones I have made: <https://www.printables.com/@3Dprintfun/collections/2463467>

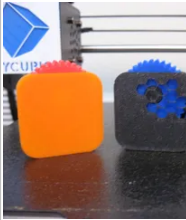

If you have ideas let me know in the comments and I will design it for you.

I will also post the hinge design on my profile for members once I get a club.

Printing Settings:
