Summary

A SWAT officer who's a lady. Awesome.

My daughter loves policewomen so I put together some models of the prints that I've modified and decided to upload the armor I used as well. It takes from the female figure model, the ponytail/helmet that I've uploaded individually and the boots from HumbleKnight. It's an awesome print at 250% and she loved it. Be sure when you're printing the frame that you use the female, **narrower shoulders**.

If you're wanting 100% sizing, just reduce it to 40% and you'll turn 250 into 100.

I've also included a Glock pistol with red dot and weapon light in addition to a drop holster I remixed to fit the female armor. The holster gets installed on the thigh before you attach it to the pelvis piece.

The picture has a Canadian flag on the chest piece but I've removed it for the model to make it more accessible. Enjoy!
