I couldn't find exactly what I wanted, so I jumped into Fusion 360 and created exactly what I wanted. This base was made to look simple, elegant, and easy to print with no supports.

Here are my requirements:

1. I wanted a thicker-styled base (6mm thick).
2. Only two solid studs on top with no text.
3. A solid flat bottom with no studs so no supports are required.
4. Nicely filleted corners and edges.
5. Different shapes for a variety depending on your taste.
