Introducing two different shotgun variations for the Dummy 13!

The first one is based off a Ithaca 37 with no stock, pistol grip, and a shortened barrel.

The second variant is based of a Serbu Super Shorty.

Foregrip of Super Shorty is really thin, I'll fix this in V1.

Be careful when removing supports around the foregrip of the Super Shorty.

This is a BETA version, so any comments and more ideas for variants will be much appreciated. :)

Some ideas that I have in mind is a tactical variant, some variants with rifle style stocks, and maybe some double barrels as well.

Like this? Why not check out some of my other models?
