- **Other:**
 - 8 mm Woodrod desired length (2x)
 - Locknut M3 (2x)
 - Cylinder head screw M3x14 (2x)
 - Countersunksrews 3x16 (12x)

0.1 UPDATE GREENHOUSE (basic)

The original idea of the “Plant indicator” was to further strengthen the gable from the inside and thereby bring additional benefit.

After the revision, you now have two options:

1. First, you can use the simple support element (blue) for both sides of the gable.
2. Alternatively, I recommend using a combination of both. On the side where you have placed the roof support you use the basic element. On the other side you can then attach the plant indicator holder (orange). In it you can store your plant spikes (green) that you are not using.

PART-LIST:

- **Printed:**
 - Plant spikes (up to 10 per holder)
 - Basic support(2x-4x)
 - plant indicator holder (0x-2x)
- **Other:**
 - Countersunksrews 3x16 (16x)
