Summary

Bored when working from home? Play some pool

[Household](#) > [Office](#)

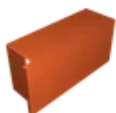

First try at making a mini desktop pool table. All the pieces can be fit together easily but optionally can be glued. The cue sticks, triangle and marbles can be stored inside the base tray (provided the top plate isn't glued to the top cover)

All that's then needed is a bag of marbles to play. Recommend adding felt feet or pads so that the base doesn't scratch the desk.
